The 3-day Water Damage Restoration Technician course is designed to teach restoration personnel that perform remediation a better concept of water damage, its effects and techniques for drying of structures. This course will give residential and commercial maintenance personnel the background to understand the procedures necessary to deal with water losses, sewer backflows, and contamination such as mold.

Course information includes but is not limited to:

- Categories of water damage 1-2-3
- FOUR mandatory principles of proper restorative drying procedures
- Psychrometry - what is it and how to make it SIMPLE
- How to dry hardwood, paneling, cabinets etc.
- Classes of water
- Permeance - just what it is and how does it affect the drying project
- What is the effect of vapor pressure and how do we control it
- How to DRY wall interiors, wood flooring, ductwork, insulation, crawlspaces
- Procedures for handling a clean water loss as well as unsanitary losses
- Learn how to calculate, on the job, how much drying equipment is required and how to set up for effective drying
- Much more including inspection procedures, biocides, microorganisms, drying procedures for carpet, pad, subfloor, wood flooring, walls, crawlspaces and sewage backflows.
- MINIMIZE your liability with knowledge Don't let old techniques stand in the way of becoming a true water loss professional. This class is packed with information and the latest technology.

Disclaimer: Badger State University is not an accredited educational institution where you can earn credits towards a college degree. Badger State Restoration is doing business as Badger State University for students to become IICRC certified.
